CUBEO

A few communities rear ducks in the same manner, and some Indians have experimented valiantly with rearing pigs as pets.

The trade element in Cubeo experimentation with plants and animals is important but not, to repeat, the exclusive interest. I had been living among the *Bahúkiwa* a short time when they learned of my liking for fruit. I was constantly presented with fruit, some wild and some cultivated. I usually made some payment in the form of a small gift. Word spread along the Cuduiari. One morning I saw a fleet of a dozen canoes or so, each heaped high with bananas, plantains, pineapple, lemons, and oranges, coming to the community. It was all for me, brought in the expectation that I would reciprocate with a gift. This transaction, however, was an unusual one, for normally the Indians have no market for any food product but dry manioc – farinha. They have no great taste for fruit and grow more than they normally consume for the sheer satisfaction of growing it. Lemons, for example, are used by women to prepare a hair wash.

MANUFACTURES

Cubeo material culture is rather elaborate for a tropical forest tribe, but not as fully developed as is that of the more westerly tribes that have a cotton technology. Material culture has been treated by Koch-Grünberg and is, moreover, fully covered in the *Handbook of South American Indians*. I shall confine myself then to a discussion of manufactures as it bears upon an understanding of Cubeo social life.

There are few products made jointly by men and women. Men ordinarily make all objects that are of wood or fiber, while women specialize in ceramics. Thus, the great bulk of material equipment has been made by men. This includes the house, all baskets and trays, hammocks, canoes, signal drums, ceremonial objects, musical instruments, weapons, and fishing gear. Women make pottery, including the large ceramic plate of the manioc oven and the hourglass-shaped pottery hearthstones. They also prepare gourds as dishes and water containers since these supplement pottery dishes. There is a small basket (*póbü*) in which personal articles are kept, and this is made by young girls as well as by men. The only product that is jointly made is the *pedíba*, the manioc grating board. Men make the board, execute a design on it, and women insert the bits of stone that form the grating surface. Whatever is made is either as a specific gift or to replace an object or utensil that is no longer serviceable. Men work slowly and for short intervals, so that the completion of a
